AZRA BADAY

İzmir, Türkiye | azrabadayis@gmail.com | azrabdy.github.io/portfolio

EDUCATION

Bachelor of Management Information Systems (3.12 GPA)

Pamukkale University — Sept 2022 – Present

- **Software Development & Database Management:** Experienced in developing scalable applications using C# (.NET) and Python, applying object-oriented programming (OOP), data structures, and algorithm design principles. Skilled in relational database design, normalization, and query optimization within MSSQL and SQL Server environments, ensuring data consistency, integrity, and performance.
- **Data Analysis & Business Development:** Competent in data preprocessing, analysis, and visualization using Excel, Orange, and Arena. Experienced in statistical analysis and simulation-based modeling for decision support. Proficient in UML and DFD methodologies for system design and process optimization, with a focus on developing scalable and efficient business solutions

EXPERIENCE

Lime Technology – Software Development Intern (Short-Term) — Jul 2025 – Aug 2025

- I have gained full-stack development experience by developing user-focused web applications, interactive chatbot systems, and dynamic platforms. I have acquired technical experience in the software development lifecycle, version control, and API integrations.
- Through various projects, I have gained experience in analyzing system requirements, identifying user needs, and customer profiling. During these processes, I actively took part in tasks such as gathering requirements, analyzing them, and preparing documentation by combining both technical and business-oriented perspectives.

SKILLS

- **Languages:** Turkish (Native), English (Advanced), Spanish (Elementary)
- **Technical Skills:** JavaScript (ES6+), C# (OOP) , Python, JWT, RestfulAPI, MSSQL, PostgreSQL, Tailwind CSS
- **Tools & Platforms:** Arena, Aris, Git & GitHub, Microsoft Office Programs (Excel, Power Point), Orange, Postman, Visual Studio, Figma, Canva
- **Additional Skills:** Teamwork, Communication, Leadership, Project Management, Organization Skills

PROJECTS

- **Clinic Consulting Personnel and Client Automation:** A desktop application developed with C# and SQL.
- **Cargo Company Chatbot System and Customer Service Panel:** A web-based system developed using React.js, CSS, Python, and PHP (WebSocket,API) .
- **AI-Powered Study Assistant:** Developing a full-stack, AI-powered study assistant web application using React, JavaScript, Node.js, Express.js, and PostgreSQL. Integrates large language models to deliver personalized learning support, intelligent recommendations, and enhanced study efficiency.
